

3-A

For Sanitary Design Integrity
You Can Trust

VERSILON™
Fluid Performance

3-A Standard 62-02

All 3-A Standards Are Not Created Equal

- Saint-Gobain offers 3-A Standard 62-02 which is for HOSE ASSEMBLIES. This is not to be confused with other 3-A standards for JUST fittings or JUST hoses.
- 3-A Standard 62-02 requires a hose assembly to provide full flow, no crevices or cracks to house bacteria
- When offering our approved hose assemblies, your customers will be confident that the hose assemblies truly are sanitary
- All hose assemblies that are 3-A 62-02 compliant will have a sticker attached to the assembly by the fabricator
- 3-A 62-02 approved hose assemblies must be at least 3/4" ID
- Surfaces, including fabricated and welded joints shall be at least RA32
- All CIP cleaned surfaces shall be readily accessible and inspectable

3-A Approved Hoses
