Electric Motors

To compete in today's global marketplace, you need a supplier who can provide electric motors that meet your quality, cost, and delivery requirements. That is why you rely on IDC Select®.

IDC Select® motors are both high quality and a great value. IDC Select® offers NEMA design motors manufactured using state of the art equipment, including fully automated winding equipment and a VPI epoxy resin system for windings. IDC Select® motors are manufactured in ISO 9001 certified facilities and have  and  ratings.

IDC Select® motors come in a variety of frame configurations to meet your demanding needs. This offering includes single phase, farm duty, and three phase motors in rolled steel. IDC Select® premium efficient NEMA design B and crusher duty NEMA design C motors come standard with an IP55 rating. The stainless steel motors come standard with an IP66 washdown rating.

Contact IDC Select® at info@IDCselect.com for questions or with special requests.

NEMA® is a registered trademark and service mark of the National Electrical Manufacturers Association.

SINGLE PHASE AND THREE PHASE ROLLED STEEL TEFC MOTORS

IDC Select® offers single phase, three phase and farm duty design rolled steel motors. Single phase motors are available in 1/3 HP to 5 HP, in both footed and C-face footed design. Farm duty motors are available in 1/3 HP to 10 HP, footed designs.

Three phase motors are available in 1/3 HP to 10 HP, including footed, C-face footed, and C-face footless designs. IDC Select® three phase rolled steel motors are inverter duty rated, with 56 frame motors at 5:1 constant torque and 10:1 variable torque. Any frame sizes 140 or larger offer a 10:1 constant torque and 20:1 variable torque rating.

STAINLESS STEEL C-FACE FOOTED & FOOTLESS

IDC Select® stainless steel motors are available from 1/3 HP to 10 HP in C-face footed and C-face footless designs, and all have an IP 66 washdown rating. IDC Select® stainless steel motors are inverter duty rated at 5:1 constant torque and 10:1 variable torque.

Fractional horsepower motors are a totally enclosed non-ventilated (TENV) design. Integral horsepower motors are a totally enclosed fan cooled (TEFC) design. All IDC Select® stainless steel motors are IP 66 rated for use in food processing and other severe environments with frequent exposure to washdown.

PREMIUM EFFICIENT AND CRUSHER DUTY CAST IRON TEFC MOTORS

IDC Select® cast iron motors are available in premium efficient NEMA design B and crusher duty NEMA design C motors ranging from 1 HP to 100 HP. Both designs are an IP55 rating. They are available in footed, C-face footed and C-face footless designs.

Premium efficient motors are inverter duty with a 10:1 constant torque and 20:1 variable torque rating. Crusher duty motors are inverter duty, with a 5:1 constant torque rating and 10:1 variable torque rating.

IDC SELECT® MOTORS

CAST IRON TEFC MOTOR

PREMIUM EFFICIENT FOOTED

- Steel fan cover
- Inverter rated CT 10:1 VT 20:1
- Cast iron conduit box with wiring diagram inside
- NEMA design B
- TEFC
- IP 55
- Cast iron grade 200HT
- Double punched foot
- Class F insulation VPI epoxy resin system protection
- Double sealed bearings
- Regreasable bearings on 284T frame and larger
- High grade silica electrical steel is utilized for the core of the motor winding producing a rotor with extremely low core losses

CC	182JM	3	4	3	B	IDC CC182JM3-4-3B
CC	182JP	3	4	3	B	IDC CC182JP3-4-3B

Type designations:

RS = rolled steel housing design
 HE= crusher duty (EISA compliant design C)
 PE = premium efficient
 FD = farm duty motor
 SS = stainless steel motor
 DP= open drip proof
 OP= oil well pump
 CC= close coupled pump motor

RPM	# of poles
3600	2
1800	4
1200	6
900	8

MOTOR BASES

IDC Select® adjustable motor bases are available in two styles. Style A and A2 are intended for fractional and smaller horsepower motors up to approximately 20 HP. This style motor base offers a one-piece formed base plate with single or double bolt adjustment. Style B and B2 fabricated metal bases cover frames sizes from 254 through 445 in a single adjusting design and 254 through 449 in a double adjusting design.

STYLE A & A2 NEMA STEEL ADJUSTABLE MOTOR BASE

DISCLAIMER

This catalog is provided solely to give you the necessary data for your product selection. Product performance is affected by many factors beyond the control of IDC Select®. Therefore, the suitability and feasibility of all products selected must be validated by you for your applications.

Every reasonable effort has been made to ensure the accuracy of the information in this writing, but no liability is accepted for errors, omissions, or for any other reason. Specifications within this catalog are subject to change without notice.

Ship weight is based upon the actual weight of the product plus storage packaging. Actual shipment may weigh more due to additional packaging, crating, palletizing, or other means to securely transport the product.
