SMART
SPILL SOLUTIONS.

SpillTech

The right tools for the job.

Maximize your spill response plan with new SpillTech products!

Potential leaks and spills are everywhere on the average plant floor. Being prepared for them requires careful planning, because there's no one-size-fits-all approach to spills. A machine with a slow oil drip? An overturned drum of hazardous chemicals? An oil spill on water or on the road? Sure, you could try to use the same absorbent for all three jobs. But is that the smartest choice? The most efficient, cost-effective solution for each of these problems is entirely different.

That's why we continue to introduce new products to our lineup of Smart Spill Solutions and why we love to help our customers pick out which ones are right for them.

NEW Maximizer . . . . *pg 28-29*

If you work with large volumes of liquid and have to prep for supersized spills, you'll want to check out our new **Maximizer** line of universal absorbents. The high-loft core with SmartSorb technology absorbs up to 14X its own weight! It also contains 75% recycled fibers, making it a great environmentally-friendly choice as well.

NEW Premium Booms . . . . *pg 18-19*

If oil on water is one of your concerns—especially if you're thinking about long-term use—you'll be interested in the benefits of our new **Premium Booms**. Its UV treated sleeve withstands 12 months of direct sunlight, and durable construction holds up well for long-term use. You won't waste any absorbtion on water with this boom, either, thanks to its 100% polypropylene construction.

NEW Contractor Grade. . . . . . *pg 12-13; 30-31*

Sometimes a job requires neither long-term durability nor heavy-duty strength. When you're looking to keep it quick, easy and economical, you'll love our new **Contractor Grade** absorbents. Choose from oil-only and universal pads and rolls and oil-only booms.

NEW Steel Containment Pallets. . . . *pg 75*

Finally, we've added **Steel Containment Pallets** to our catalog. They're the strongest on the market and if you're storing hazardous materials, there's no better choice. These pallets meet fire code requirements that containment be constructed of non-combustible materials.

Oil-Only Pillows

Oil-only pillows are easy to place in hard-to-reach areas

- Absorb high-volume leaks and spills of oil and other petroleum-based liquids on land or water
- Use under machines and leaky hydraulic hoses or wedge in corners cramped for space
- Pulls liquids from the floor like a sock, catches leaks like a pan, and absorbs spills like a pad
- Large surface area speeds the absorption process and shortens the overall response time on land or water

Containment Boom and Anchor System

Non-absorbent boom contains spills above and below water; anchor system keeps in place for optimum containment

- Quickly contain spills and debris in water
- Boom floats to keep oil from spreading into or out of a contained area; skirt hangs below the surface to help prevent spills from creeping underneath
- Ballast chain adds weight to help keep skirt taut
- Ideal in water intakes, channels, API separators, ponds, lakes, streams, marinas, canals, ditches and other shallow areas

Comes pre-assembled for quick and easy deployment.

MAXIMIZER

Get tremendous absorbency with our thickest mat.

- Great for Large Leaks and Spills
- Highly Absorbent
- Environmentally-Friendly

GO BIG ON SPILLS

Work around high volumes of liquid? You need high-loft mat as an essential component of your spill response stash. SpillTech's Maximizer line of absorbents is designed especially for large spills and high-volume leaks. The Maximizer's SmartSorb technology features a superabsorbent high-loft core that's strong enough to hold together, even when fully saturated.

SmartSorb technology

Super-absorbent core fuses natural and synthetic fibers to enhance absorbency, strength and loft.

Fused layers create strength and enhance absorbency.

Lofty inner core for super-absorbency
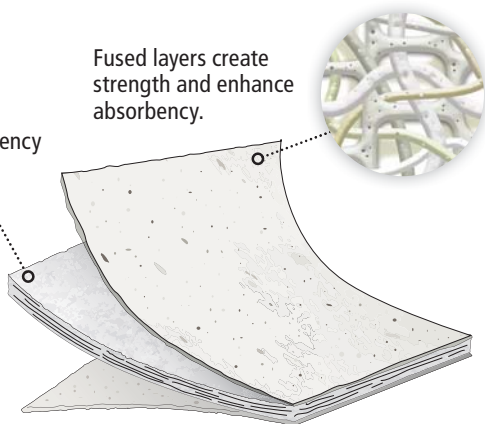

Maximimum loft, maximum absorbency, maximum performance! The Maximizer soaks up more liquid with less mat, saving you money.

SpillTech

Universal Pillows

Absorb high-volume leaks and spills of oils, coolants, solvents or water

- Easy to place in hard-to-reach areas — use under machines and leaky hydraulic hoses or wedge in corners cramped for space
- Pulls liquids from the floor like a sock, catches leaks like a pan, and absorbs spills like a pad
- Large surface area speeds the absorption process and shortens overall response time

Universal Neutralizing Sorbent

Neutralizes, solidifies and indicates safe pH in one easy step

- Universal Neutralizing Sorbent (UNS) is the most efficient method to clean up battery acids and bases — even hydrofluoric acid (HF)!
- pH color indicator shows when a safe pH has been achieved
- Solidifiers totally encapsulate the liquids preventing further mitigation or reacting with other liquids
- Buffered formula prevents "overdosing" to another hazardous pH level
- Non-toxic to humans, animals, marine and plant life
- Amphoteric molecules power UNS to neutralize everything

Spill Kits for Quick Response

The right products for quick response to any spill, anywhere

Spills happen no matter how hard you try to avoid them. Forklifts knock over drums, tanks are punctured and transporters leak and drip. A quick response is your best weapon in the fight against spills.

Whether you need to clean up a dangerous chemical spill or eliminate a slip-and-fall hazard, you'll be prepared with SpillTech Spill Kits. Over the next 17 pages, you'll find a wide range of Spill Kits and accessories to meet your needs. These quality SpillTech products will help you comply with the regulations below. If you don't see what you're looking for, page 58 explains how we can customize a kit to your exact specifications.

Build a Custom Spill Kit with Just What You Need!

Get the perfect Spill Kit for your application

If you can't find exactly what you need in our selection of pre-packed kits, we'll be glad to build one to your specifications. Answer five simple questions (at right) to help choose the type and quantity of sorbents you require, the accessories to make the response safer and the container that will work best. There's no extra charge for this service, so it's an easy way to customize your spill response plan and stock only the sorbents and PPE you really need. After you've made your list, just contact your local Distributor and we'll do the rest!

1. How much do you need to absorb?

What is your worst-case scenario? You'll need enough sorbents to clean up the maximum amount, whether it's one gallon or one hundred.

2. What liquid are you absorbing?

For multiple everyday liquids, use Universal. To soak up oil and repel water, choose Oil-Only. To alert workers to a dangerous spill, use HazMat.

3. What type of spills do you deal with?

Slops and spills use pads for quick wiping and cleanup. Drum/tank leaks need more socks for diking and Plug & Dike epoxy to stop the flow. Large-volume spills require booms for containment and pillows for more sorbency.

4. What type of PPE and accessories will you need?

Most spills call for boots, gloves and goggles. Will you need coveralls? How much chemical protection do you need? How often will you have to replace disposable items?

5. What type of container will you need?

For removing saturated sorbents, use a UN-rated Overpack/Salvage Drum. Stationary Kits can go in a flat-bottom Overpack. Movable kits require a kaddie or wheeled overpack.

OverPack Salvage Drums

DOT-approved for salvage, ship with confidence

All OverPacks are DOT-approved and X-rated for use as salvage drums. They help companies conform to federal regulations when shipping damaged or leaking containers of hazardous materials, or aborbents contaminated with hazardous substances.

OverPacks are sturdy and chemical resistant for years of use. Integrated forklift ledges and handles (on containers with wheels) make them easy to lift, move or carry. Avoid the extra expense of a dolly when you buy a wheeled OverPack, which provides you with great versatility in a single integrated product.

OverPacks vs. Salvage Drums

What's the difference?

An **OverPack** is an outer packaging that holds and protects one or more intact, undamaged smaller containers of hazardous materials. A **Salvage Drum** is a metal or plastic open-head drum, tested to DOT requirements, used to transport damaged, defective, leaking or non-conforming hazardous materials packages, or hazardous materials that have spilled or leaked.

SALVAGE DRUM

Tyvek Coveralls

- Keep out dust, particulates and moisture with these lightweight, durable coveralls
- Ideal for working around gasoline, electrical equipment, chemicals, paint, printing presses and even nuclear contaminants
- Effectively block asbestos, lead, radioactive dust and more
- Flexible and strong in wet or dry environments and in temperatures up to 100°F

A-TYVEK

A-APRON-WH

SpillBerm Plus Containment Barrier

Non-absorbent polyurethane deploys fast to prevent spills and leaks from spreading or contaminating drains

- Sturdy, flexible 100% polyurethane barrier stands up to oils, coolants, solvents and water

- Tacky bottom grips smooth surfaces and keeps liquids from seeping underneath

- Built-in dovetail connectors create a leakproof seal and let you combine lengths of SpillBerm to fit any area — without extra parts
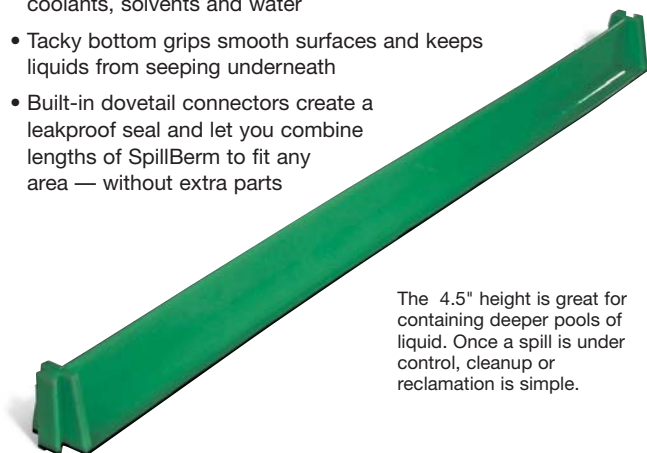

The 4.5" height is great for containing deeper pools of liquid. Once a spill is under control, cleanup or reclamation is simple.

HYC Helps you comply with 40 CFR 112.7(c)(1) and 40 CFR 263.30(a). See page 99 for details.

Connectable Spill Berm

A tacky bottom helps create a tight seal to confine leaks around machines or guard drains

- Easily bends to fit any angle or curve

- Quick-connect interlocking ends "snap" individual sections together to create longer lengths, so you can contain almost any spill

- Flexible 100% polyurethane elastomer is non-absorbent and resistant to a wide variety of chemicals and fluids

- Just clean it with soap and water, then it's ready to reuse
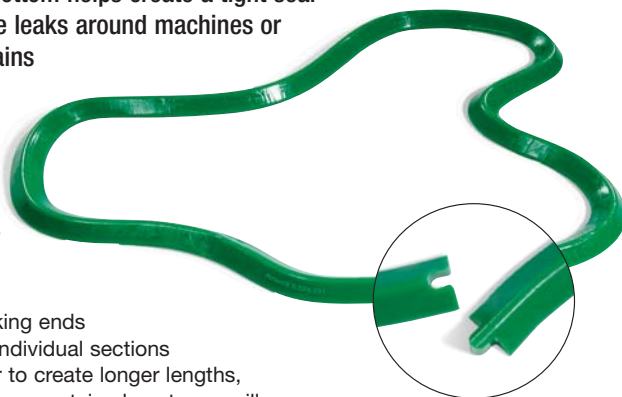

HYC Helps you comply with 40 CFR 112.7(c)(1) and 40 CFR 263.30(a). See page 99 for details.

SpillCurb Containment Berm

Divert or contain liquids without absorbing them using a customizable polyurethane SpillCurb Containment Berm

- Sturdy, flexible 100% polyurethane berm stands up to oils, coolants, solvents and water

- Combine 10' lengths of SpillCurb with Corners and Connectors to fit any area

- Tacky bottom grips smooth surfaces

- Store near spill-prone areas since it's quick and easy to deploy

- Cleans easily with soap and water for reuse

Corners, wall ends and straight sections secure tightly for leak-free connections, are easy to install, and remove simply with a flat-bladed shovel.

Features and Benefits

- Semi-permanent, highly visible berm that's customizable to your desired size and shape
- Vinyl-covered foam barrier resists oils, coolants and most chemicals
- Contains liquids around leaky machinery or storage areas
- Easy to cut with utility knife
- Recovers its shape under foot traffic or light, wheeled equipment
- **BYOB-KIT** includes four straight sections, four corners and Sili-Thane sealant to create a customized shape suitable to your needs

DrainCovers

Tough, reversible drain covers in three sizes

- Solid polyurethane covers are tacky on both sides so either can form a tight seal to block contaminants

- More chemical resistant than rubbers or plastics, covers stand up to a wide range of chemicals, solvents and oils

- Reusable; can be washed then stored in the handy, portable box

- Transport and store your drain covers in optional polypropylene cases to better protect them from damage

ADC42-R

ADC36-CASE

Your DrainCover fits inside this optional hi-viz case to protect it from weather, abrasion, puncture, UV and more, so it's ready to use when you need it.

HYC Helps you comply with 40 CFR 112.7(c)(1) and 40 CFR 263.30(a). See page 99 for details.

Conical DrainPlugs

Confidently block pollution without a permanent seal

- Reusable Conical DrainPlug fits conveniently under a drain's grate and pulls out easily to allow normal flow

- Chemical-resistant polyurethane reliably seals drain to keep out unwanted liquids

- Easy to install — just lift grate, press tapered Conical Plug into drain and replace grate; to remove, pull up on metal ring using hand tools

- Cleans easily with soap and water for reuse

A Conical DrainPlug fits discreetly under the grate to prevent spilled oil and other pollutants from getting into your drains without disrupting traffic or creating a trip hazard.

HYC Helps you comply with 40 CFR 112.7(c)(1) and 40 CFR 263.30(a). See page 99 for details.

Create Custom Drum Storage with Ultra-Spill Decks

Low-profile, modular Spill Decks let you design and create a containment system that meets your specific needs

- 1-, 2- and 4-Drum Ultra-Spill Decks can be used alone or are easily connected together with Bulkhead Fittings **(ULT1073)** and T-Strips **(ULT1131)** to allow a virtually unlimited number of customized configurations

- Bulkhead Fittings lock Spill Decks together while allowing spills to flow between decks; can help you meet containment regulations depending on the size of container stored and the total sump capacity of the deck system

- All-polyethylene construction meets a wide range of chemical compatibility needs

- Low height offers safe and convenient loading/unloading of drums

- Optional Loading Ramp **(ULT1089)** provides added drum handling safety and convenience

100% Galvanized Steel for increased durability

NEW

Forklift entry for easy movement

Removable grating
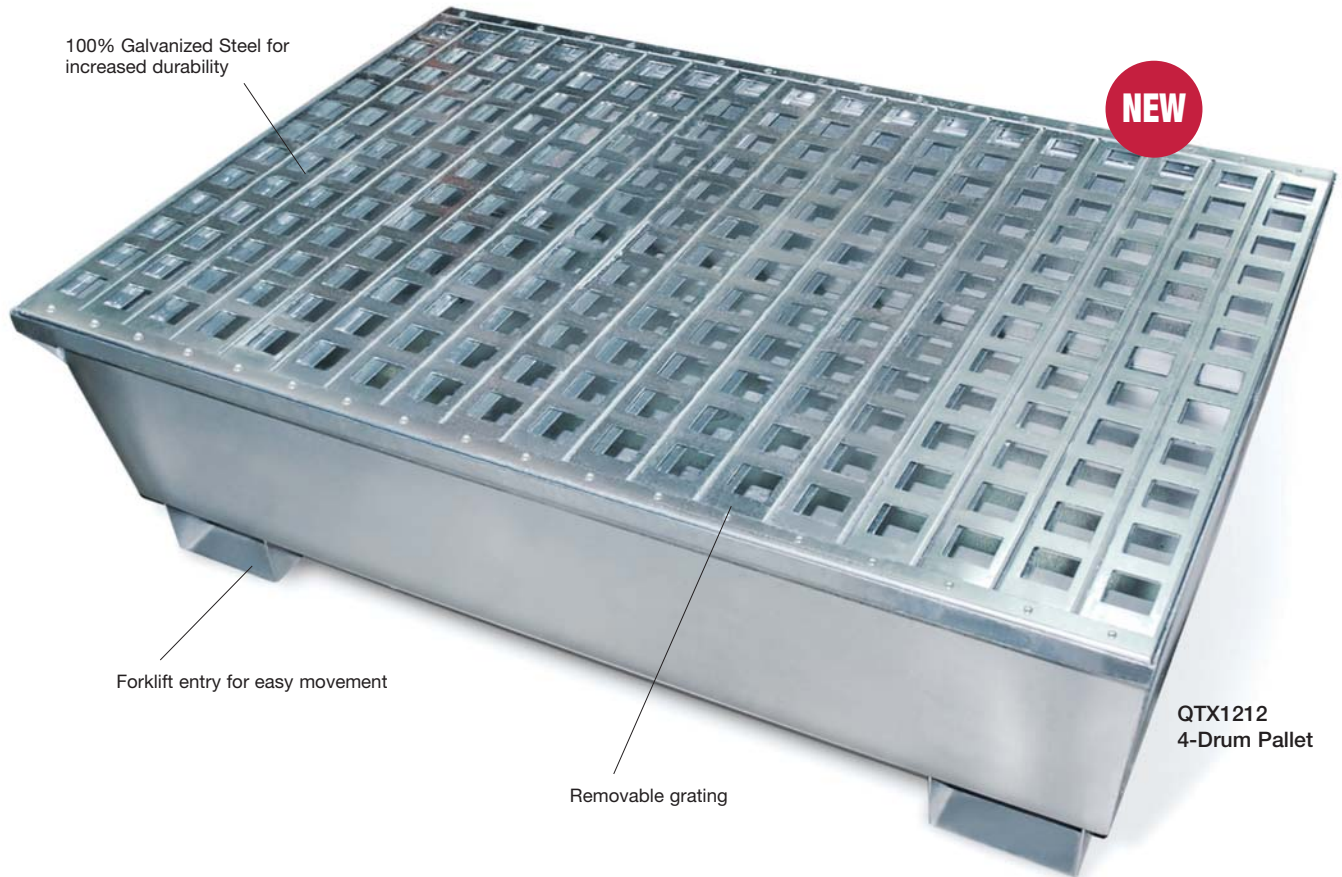

**QTX1212
4-Drum Pallet**

Steel Containment Pallets

These 14-gauge galvanized steel containment pallets are the strongest on the market!

- Each pallet has a 250 PSF loading capacity and a 68 gallon sump capacity
- Noncombustible pallets meet spill control and containment regulations required by NFPA 30 & NFC 2010
- Pallets will not melt under fire exposure or fail from normal material handling activities
- 100% leak-free tested

Why choose steel?

Plastic pallets have the potential to melt under fire exposure and fail to meet fire codes. Steel Pallets have a longer life cycle and meet fire code requirements for containment be constructed of non-combustible materials. Perfect for the storage of flammable materials!

Poly-Collector and Accessories

Funnel prevents overspills while allowing multiple filters, pails and cans to drain at once

- Fits both closed-head and open-head 55-gallon drums and other containers
- High sidewall prevents splashout

Poly-Collector is the economical choice for containment of 55-gallon drums

- Strong, tough, 100% polyurethane outer shell has a 66-gallon capacity — holds a 55-gallon drum, even if ruptured or leaking
- UV-stabilized for a long, productive work life

Mobilize your Poly-Collector for convenient point-of-use dispensing or collection

- Castered wheels support the Poly-Collector even when it's fully loaded; easy movement for dispensing and emptying

Poly-Rack Drum Storage System

Create a storage system for up to six drums

- The centerpiece of the Poly-Rack System is the Poly Racker (**ENP6000**), a unique one-piece polyethylene rack that secures two 55-gallon drums

- Deep dispensing well holds 5-gallon pails and contains incidental spills and splashes without contaminating the sump

- Dispensing wells have a scalloped edge so pails can be easily removed

- Add up to two Poly Stackers (**ENP6002)** to your Poly Racker to increase drum storage

- Each Poly Stacker holds two 55-gallon drums and can be quickly stacked with a forklift

- Increase safety and productivity when you add the Poly Shelf (**ENP6003)** to your Poly-Rack System

- Poly Shelf attaches easily to a Poly Stacker and holds containers for simultaneous dispensing from all drums

SpillPal Portable Spill Containment

Flexible sidewalls provide quick, portable spill containment

- Great alternative to hard poly pallets that must be moved with a forklift

- Provides versatile, portable spill control during temporary storage of drums, machine parts, tanks and generators

- Light, foam sidewalls spring back to their original shape after any pressure is applied

- Can also be used as a washdown pad or pumping station

- Affordable, portable and easy to set up

- Reusable containment can be folded and stored to save floor space

- No ramps or other accessories are required for usage

Foam sidewalls allow easy access for driveovers from handtrucks and forklifts.

Product Information - All information provided about SpillTech® Products is based upon testing and data believed to be accurate. However, the reliability of this information is not subject to any guarantee.

Handling and Disposal - Liquids absorbed by SpillTech® Products are not rendered less hazardous, less toxic or less flammable by absorption; liquids remain in their original states. Therefore, caution in the handling, storage, disposal or cleaning of SpillTech® Products after use should be in accordance with the original liquids absorbed. Consult the Material Safety Data Sheet of each liquid absorbed for proper handling. SpillTech® Products must be transported and disposed of in compliance with local, state and federal regulations. SpillTech does not recommend specific procedures due to variances in regulations, applications and liquids used.

Warranty - SpillTech will replace any product found to be defective in material or workmanship. This warranty shall only apply where the buyer has issued written notice to SpillTech within thirty (30) days of purchase; it does not extend to product abuse, misuse, neglect or accident, nor to product repaired or altered by any other than SpillTech. This warranty is exclusive and in lieu of all other warranties, expressed or implied.

Limitation of Liability - In no event will SpillTech's liability for its Products exceed the purchase price paid for its Products. SpillTech will not be liable under any circumstances for any special, indirect, consequential, or punitive damages, including, but not limited to loss of profits, loss of business opportunities, or loss of goodwill, even if advised of the possibility of such damages.
